ACTIVE SECURITIES & IT SOLUTIONS

Active

Securities & IT Solution

What We Do

ACTIVE FORCE is a leading private security service providing company in Bangladesh

ACTIVE Securities & IT Solutions deliver innovative solutions, allowing clients to embrace the technologies that stimulate their companies' future growth. We build innovative IT infrastructure solution and support services, along with application and security services using technologies, combined with collective business, technical and industry expertise.

Consultancy

Active Securities & IT Solution knows that without proper consultation, it is not possible to embark a new project or make a decision to buy new equipment or to set them.

01

It is to grow your system, grow your business and every on-going task. For long run you have no alternative without a proper plan and guideline that works just like a navigator for your business. We understand your necessity for ensuring that your equipments need to meet all the requirements.

Why need our Consultancy?

We are ready to guide you in the proper way to choose proper equipment, to do proper task and well set up of your equipment. Because Active Securities & IT Solution has an expert team to support you.

○ Our expert team consisted of specialists are perfect and experienced at providing proper advice and strategy.
○ Experts will give you both short and long term planning what you need.
○ Advice and guidance will be given on both an existing and proposed Equipment purchase or setup process.
○ We will measure your required equipment and utilization in a proper way.
○ Active Securities & IT Solution will provide you the necessary documentation if needed.
○ You will able to take our consultancy within your budget.
○ Cost reduction approaches will be suggested by our experts.
○ Already we served many companies including multinational companies.

After taking our consultancy service you will able to know about your position and future steps, how to think that and how to do that. We decorated all our services to meet every needs of each business related to the equipment. You will find Active Securities & IT Solution always beside you.

Installation

Whether you are planning or already have equipments that need installation process Active Securities & IT Solution is there for you to provide installation services.

02

Our experts in every specific field are ready to help you with your equipment and the installation process. Our expert and certified engineer are always ready to provide services e.g installation, replacing old equipment, upgrading your system to improve or enhance the performance with minimal cost and time-frame to keep your process smooth and trouble free.

Installation at a Look

We actually work with Sound System, Compliance Items, Industrial Safety, IT Equipment, Electronics Equipment and other equivalent sector, but we are capable to serve you more than our listed service. We like to engage specific expert related to your equipment to ensure proper installation process. We have the both ability and the work force to solve your software and hardware related problem. Although we have specific brand products, but we are happy to work with your preferred suppliers or brands.

If a piece of your equipment is going to break within a few days or use, then we have the option of Hot Testing by our engineers. If you feel that you don't have to engage any specific expert, but need advice or any type of consultancy then we are ready to meet with our experts to provide you a guideline. If you need just a proper plan of installation, then we are ready to make plans for you to ensure the optimum productivity and top efficiency.

Our experts will configure your equipment's with reduced time and disruption to your business. We will configure your equipment as like "Plug and Play" as possible. At Active Securities & IT Solution, we work closely with all of our customers to understand the needs of their business and business requirement. And serve them the best with our equipment and service.

Service

You can also take our services. Active Securities & IT Solution is ready to serve you

03

related to Sound System, Compliance Items, Industrial Safety, IT Equipment, Electronics and other equivalent sector setup and maintenance. To take our service you do not have to buy products from us. You are also allowed to deal with us at any stage of service related to our business.

Maintenance

Active Securities & IT Solution also works to keep your equipment in production and in safe operating condition.

04

Therefore, we also provide repair & maintenance service to our clients by our trained personnel's to keep your equipment running. If you need routine service and maintenance for keeping equipment safe and running at highest performance, we are perfect for that. It will help you to avoid downtime.

Why need Our Service

We are ready to guide you in the proper way to choose proper equipment, to do proper task and well set up of your equipment. Because Active Securities & IT Solution has an expert team to support you.

- We always work hard to give you a perfect solution to your equipment.
- We have specialist for every section we do business with you.
- If you need any recovery service, we are ready to serve you.
- We are able to work on your equipment, although it has International Setupment.
- You will find our service cost that fit into your budget.
- We will charge additionally if you want to take our service after purchasing products from us.

We like to serve you with our best effort and ensure Maximum satisfaction. We give guarantee for our service as like our quality products.

We Like to Offer You Maintenance Service That Have

So it is easy to save valuable resources. You know that well, machine downtime can affect on your work environment and production level too.

- We have trained and expert technicians to maintain your equipment
- Our maintenance team will keep all of your equipment humming.
- We will provide you On Site Inspection Report after observing your equipment in every time. Both before and after start maintenance.
- Repair and optimize of hardware are also included in our maintenance service.
- We also can help you in per-incident repair.
- You are allowed to deal with us for long-term maintenance.
- We also assistance for re-setup your equipment.

After taking our consultancy service you will able to know about your position and future steps, how to think that and how to do that. We decorated all our services to meet every needs of each business related to the equipment. You will find Active Securities & IT Solution always beside you.

Supply

05

Active Securities & IT Solution is one of the most significant multipurpose equipment and product suppliers in Bangladesh.

We believe in strong and solid relationships. We do supply multipurpose equipment, products and product solutions for business or corporation to meet our customer's expectations.

24/7 Support

06

Active Securities & IT Solution is one of the biggest technical equipment supplier company in Bangladesh.

Beside supply IT Equipment, Industrial Safety, Sound System, Electronics and other similar products, we also provide support for those types of products. Although haven't purchased those equipment's from us, but you are allowed to take your support. You will find us at the accurate time and proper support when you are actually needy for this.

About our supply chain

We mainly supply Sound System, Compliance Items, Industrial Safety, Electronics equipment, IT equipment and other equivalent sector. We able to supply a wide range of product according to your demand. You may also able to know about the product we usually supply after visiting our Product Page.

- We have already supplied a huge number of products with reputation in Bangladesh. We are proud after doing that and we have a rich client list. You may check our client list.
- All of our customers fully depend on us to deliver the right equipment to the right place and must be at the right time.
- We are able to supply your products according to your demand, although seems it is not available to our product page right now.
- Active Securities & IT Solution makes deal with Business and corporate purpose, but you are welcome if you need any of our products as an individual person.
- We are committed to meet the standards and Code of Conduct because it's our Responsible Trading Principle.
- Our approach of supply management is standard with international quality.
- We offer your own way and method of delivery.

Our proven approach to supply products and the quality of products enables us to offer you to give us order with confidence. We promise that, you will find Active Securities & IT Solution as the best product supplier for you and your business.

Feel free to ask about Support

Active Securities & IT Solution believe in customers' good experience and this is our business success. For this reason, we provide 24/7 customer support with an expert team of customer care executives. You will get the following services from our customer service for a better business deal.

- Give an order of purchase.
- Tracking order and confirmation
- Replacement orders if necessary
- Sending equipments to the place as you wish
- Cancellation of orders
- We also assistance for re-setup your equipment.

Just knock for support any time you got trouble.
For our business reputation we give high importance on customers complain about any occurrence. So, if you have a complaint about anything of us, feel free to send us a mail at Contact or instant make a phone call to us. We will move for you within few times. Thanks for stay with us.

Our Services

Keeping an Eye on Things

From client engagement to technology implementation to service delivery, we give you access to our proficiency in advanced technologies and proven practices along the entire IT life cycle. Importer of Electronic & Machinery Goods.

Baggage Scanner

Garret Baggage Scanner

Garrett X-Ray Baggage Scanner is called "Check the dangerous instrument". The working principle is to use a small dose of X-rays to illuminate the articles for inspection, use a computer to analyze the transmitted rays, and analyze the properties of the penetrated articles according to the changes in the transmitted rays.

MCD Baggage Scanner

X-Ray Baggage Scanner is called "Check the dangerous instrument". The working principle is to use a small dose of X-rays to illuminate the articles for inspection, use a computer to analyze the transmitted rays, and analyze the properties of the penetrated articles according to the changes in the transmitted rays.

Proline UK Baggage Scanner

According to the baggage sizes, these x-ray machines models are different from tunnel size of 60cm x 40cm to 100cm x 120cm. Dual view (Model name with "DV") means the X-ray baggage scanner is designed with 2 x-ray generators, and the x-ray beam shoot from vertical and horizonal directions to scan baggage's and have 2 angles of x-ray images. This technology is upgraded for the improved for international aviation standards.

CCTV System

AVTECH CCTV System

Circuit television is popularly known as CCTV. It is a video surveillance system which transmit live footage of a place to connected television monitor. It is different from television broadcasting system in this sense that it doesn't use any radio wave frequency or telecasting base station. It just sent signal of a video camera to a connected monitor.

Bosch CCTV System

CCTV, or closed-circuit television, is a system that allows you to keep an eye on what's going on in and around your business. Cameras and monitors enable you to view events live, and recorders archive footage for later reference. Don't mistake a CCTV monitor for an ordinary television. Close circuit television is popularly known as CCTV.

Dahua CCTV System

Garrett X-Ray Baggage Scanner is called "Check the dangerous instrument". The working principle is to use a small dose of X-rays to illuminate the articles for inspection, use a computer to analyze the transmitted rays, and analyze the properties of the penetrated articles according to the changes in the transmitted rays.

Hikvision CCTV Cammara System

CCTV meansClose circuit television. Modern technology allows wireless connection of CCTV camera to observation room. CCTV mostly used in front of where continuous surveillance is necessary, such as bank, school, bars, casinos, airport, restaurant, military base and government office. Video surveillance around the world has been increased tremendously. Because threat from terrorist attack and increased crime scene made it useful tool for security forces.

Jovision CCTV System

CCTV (closed-circuit television) is a TV system in which signals are not publicly distributed but are monitored. CCTV's are one of the popular tools to safeguard your family and premises. It just needs one-time investment and after that, it will work according to your convenience. One should Install it inside the premises. Yes, it cannot stop the crime but at least it can record all the activities for further investigation.

Fire Equipments

EMACO Fire Equipments

A fire extinguisher is an active fire protection device used to extinguish or control small fires, often in emergency situations. It is not intended for use on an out-of-control fire, such as one which has reached the ceiling, endangers the user, or otherwise requires the expertise of a fire brigade.

Global Fire Equipments

Fire extinguisher, portable or movable apparatus used to put out a small fire by directing onto it a substance that cools the burning material, deprives the flame of oxygen, or interferes with the chemical reactions occurring in the flame. Water performs two of these functions: its conversion to steam absorbs heat, and the steam displaces the air from the vicinity of the flame. Many simple fire extinguishers, therefore, are small tanks equipped with hand pumps or sources of compressed gas to propel water through a nozzle.

Gamewell Fire Alarm System

Firefighting Equipment is the main firefighter equipment used to extinguish fires, including fire fighting hose, portable fire pumps, fire hose reels, fire monitors and fire fighting nozzles. At Fire Product Search we care about your fire station's or fire department's fire fighting equipment and its ability to respond at short notice to the hazardous situations when firefighting. That is why we proudly feature only the highest rated, highest quality firefighting products from industry-trusted brands like Delta Fire, Angus Fire and LEADER. Our fire fighting equipment includes products like firefighting nozzles, fire hose, fire hose reels, all types of firefighting monitors and fire fighting pumps. All of which are made and designed using the latest technological advances, innovations, and materials, which are certified to meet or exceed NFPA and EN Standards. When it comes to finding the latest fire fighting equipment for your fire station or fire department choose Fire Product Search.

Honeywell Fire Alarm System

A fire extinguisher is an active fire protection device used to extinguish or control small fires, often in emergency situations. It is not intended for use on an out-of-control fire, such as one which has reached the ceiling, endangers the user (i.e., no escape route, smoke, explosion hazard, etc.), or otherwise requires the expertise of a fire brigade. Typically, a fire extinguisher consists of a hand-held cylindrical pressure vessel containing an agent that can be discharged to extinguish a fire. Fire extinguishers manufactured with non-cylindrical pressure vessels also exist but are less common. Honeywell Farenhyt Series Black is a new line of cost-effective, turnkey fire systems equipped with the latest technologies to protect your facilities. Safety is a top priority in the education, healthcare and hospitality industries. Farenhyt Series Black provides an economical solution for new construction, upgrades or retrofits, to keep your people inside and your buildings safe.

Metal Detector

Garrett Archway Metal Detector

The Garrett PD6500i walk through metal detector (also often referred to as a knife arch or walk through security metal detector arch) ...is the perfect solution when you need to scan lots of people quickly and efficiently for concealed weapons, or other hidden metal objects.

Garrett Hand Metal Detector

Garrett metal detector is an electronic instrument that detects the presence of metal nearby. Metal detectors are useful for finding metal inclusions hidden within objects, or metal objects buried underground. They often consist of a handheld unit with a sensor probe which can be swept over the ground or other objects.

MCD Archway Metal Detector

An Archway Metal Detector (AMD), also called a Walk-Through Metal Detector, is a stand-alone structure that resembles a wide door frame. When a questionable item or material is detected by an AMD, it produces an alarm signal (a light or audible alarm, or both).

ZKTeco archway metal detector

This archway metal detector gate has 5.7-inch bright LCD display. Chinese and English operating menu, friendly man-machine interface. It's equipped with remote control, can be modified with the keyboard to set the security door parameters. It has Super bright LED remote indicator with the human body can directly display the alarm area, accurate instructions to check the location of goods, and with sound and light synchronization alarm, at a glance, greatly improve work efficiency. The highest sensitivity can detect the size of the paper clip metal. Each detection area has 100 sensitive gears, and set the overall sensitivity of 100 adjustable, in order to achieve the level of sensitive optional. Unique wide environment to adapt to technology, can achieve any one of the security door in the panel settings can be applied to the detection of paper clips can also be achieved only detect large tools and prohibited items.

Supper Scanner Hand Metal Detector

The Garrett Super Scanner V provides outstanding performance, stability and extreme sensitivity in detecting the smallest metallic objects. Detects ferrous, non-ferrous and stainless-steel weapons, contraband and other metallic objects. Digital microprocessor technology eliminates the need for periodic sensitivity adjustments. Momentary push button helps temporarily eliminate detection of nearby ambient metal such as rebar, metal walls. Sharp audible alarm, bright red LED and selectable vibrating indicates the detection of metal. Powered by 9V battery, operating time up to 100 hours. These metal detectors have LED flashlight. It's very simple to use. These detectors are used by police and paramillitary forces to detect ferrous & nonferrous metals, bombs, explosive and weapons.

Mine Lav Archway Detector

A metal detector is an electronic instrument that detects the presence of metal nearby. Metal detectors are useful for finding metal inclusions hidden within objects, or metal objects buried underground. They often consist of a handheld unit with a sensor probe which can be swept over the ground or other objects. If the sensor comes near a piece of metal this is indicated by a changing tone in earphones, or a needle moving on an indicator. Usually the device gives some indication of distance; the closer the metal is, the higher the tone in the earphone or the higher the needle goes. Another common type are stationary "walk through" metal detectors (see § Security screening below) used at access points in prisons, courthouses, and airports to detect concealed metal weapons on a person's body.

JKDM Hand Metal Detector

Handheld metal detectors are designed for quick and efficient body search scanning for knives, weapons and concealed metal objects. Metal detector wands offer a practical, low cost alternative to airport style walk through, arch type detectors which are designed for rapid scanning of high volumes of people. Handheld metal detectors are often used in conjunction with walk-through metal detectors, enabling operators to scan a person's body to locate exactly where metal objects are concealed. They are extremely easy to operate simply requiring a single sweep across a subject's body or across a bag or container, to detect hidden metal objects. JKDM-3003B1 is a small handheld metal detector for security checking. It is easy to use, without any adjustment controller, fast response to detect metal objects, sound and LED light emitting alarm simultaneously. A clear low frequency tones sound can be heard when detect small metals, and high audio tone can be heard when detect large metal objects.

Walkie Talkie

Baofeng BF 777s

The BF-777S is a full featured two-way radio and handheld transceiver with long range capabilities up to 6km. Each radio comes with a charger, antenna, and everything you need to get started communicating conveniently at a long range. It has CTCSS / DCS function, built-in LED torch, low battery alarm, power-saving function, 400-470MHz frequency range, 5-10 km talk range, 50ohm antenna impedance, -30 to +60 working temperature, PC software programmable, single frequency and single band, 3.7V DC voltage, 2800mAh battery capacity, 1-year warranty.

Baofeng BF 888s Walkie Talkie

The BF-888S is a full featured two way radio and hand held transceiver with long range capabilities up to 6km. Each radio comes with a charger, antenna, and everything you need to get started communicating conveniently at a long range, whether in a recreational context like camping or on site at your business. It has LED switch, PTT switch, volume control, 1-3 km communication range, voice prompt / PC programming / voice scramble / encryption, 50 ctcss / 105 CDCSS function, 400-470 MHz frequency, emergency alarm / intelligent charging, battery save / low voltage alert, time-out timer, torch light, 1500 mAh battery, 60 x 33 x 115 mm dimension

Baofeng UV-5R

The BaoFeng UV-5R is a compact handheld transceiver providing 4 watts in the frequency range of 136-174 MHz and 400-480MHz (520MHz later versions). It is a compact, economical HT that includes a special VHF receive band from 65 – 108 MHz which includes the regular FM broadcast band.

Baofeng UV-9R

*Baofeng UV-9R has VHF 136-174, UHF 400-520MHz Frequency Range. Theoretical communication distance is 10 km, Power is 15W, Polymer lithium battery is 8000 mAh, Weight is 0.5kg Size: 12*6*4cm.*

BaoFeng UV82

BaoFeng UV-82 handheld walkie talkie has 400-520 MHz frequency range, two-way radio, 128 groups channels storage, dual band, dual display, FM radio, emergency alarm, shortcut menu operation mode, 0-9 grades VOX selectable, VFO and memory channel scan, low battery alert, keypad lock.

kenwood tk 3207

Kenwood TK-3107 UHF handheld walkie-talkie two-way radio has frequency range 400-470 MHz, 16 channels, output power 4W/1W, built in CTCSS / DCS, wide-narrow channel bandwidth, time-out timer, busy channel lockout, two colore LED indicator, low battery alert. Also, this Kenwood TK-3107 UHF handheld walkie-talkie two way radio.

Kenwood TK 3107

Kenwood TK-3107 UHF handheld walkie-talkie two-way radio has frequency range 400-470 MHz, 16 channels, output power 4W/1W, built in CTCSS / DCS, wide-narrow channel bandwidth, time-out timer, busy channel lockout, two colore LED indicator, low battery alert. Also, this Kenwood TK-3107 UHF handheld walkie-talkie two way radio.

Kirisun PT- 558s

Kirisun PT-558s, more formally known as a handheld transceiver, is a hand-held, portable, two-way radio transceiver. Its development during the Second World War has been variously credited to Donald Hings, radio engineer Alfred J.The Kirisun PT558 is a professional-quality walkie-talkie - exactly the same strong alloy chassis, lithium-poly battery and "drop-in" charger as the licenced walkie-talkies- except with no need for a licence. This is one of our best selling "general purpose" licence-free walkie-talkie radios. It is robust enough to stand up to everyday business use. Kirisun PT-558S two way radio has frequency range 400~420MHz, channel capacity 16, radio channel spacing 12.5KHz / 20KHz / 25KHz, frequency stability 2.5PPM, dimension 56.5mm x 102mm x 29.5mm, weight 235g, battery 1200mAh, 21.4 first IF receiver, 450 second IF receiver, rated audio distortion 5%, FM hum and noise 40/ 35.

Active Force
We protect your business

Kst 245 Walkie Talkie

KST-245 radio walkie-talkie has 80 channel capacity, 245-246MHz powerful frequency range, ±2.5PPM frequency stability, 12.5 kHz channel spacing, 7.2V operating voltage, −25°C ~ +60°C operating temperature, 50Ω antenna impedance, 190 gm walkie-talkie weight, 115 x 56 x 30 mm dimensions and 190gm walkie-talkie weight.

Motocom MC 4 Digital Walkie Talkie

Motocom MC 4 Digital Walkie Talkie. Motocom Long Range Wifi 3g 4g Two Way Radio. Support Group Call, private call by using SIM card or wifi. Motocom MC 4 Digital Walkie Talkie is a Long-range walkie talkie. Push-to-talk over cellular Digital Walkie Talkie is the next-generation radio communication technology. It delivers instant yet secure communication over carrier networks or broadband connectivity, making it possible to communicate with other users anywhere in the world. It offers one-touch instant communication with one or to many in less than a second. Push to talk communication offers intuitive and easy to use built for business as it can be managed using a dispatch management system. It can provide not just instant talk, but live GPS tracking, emergency alert notifications and more.

MOTOCOM MC 500

Motocom MC 500 walkie-talkie has 9 watt handset capacity, electronic tuning, large volume, PC programmable, long range communication, dust proof and water proof, high capacity battery, super long standby time, 2800 mAh li-ion battery. It's Frequency Range is 245-246MHz and RF Output Power is 1W.

motorola GP 338 walkie talkie

Motorola GP338 Plus display radio - the smallest in Motorola's Professional Series. It is compact, light and fit easily into the palm of your hand. A versatile alternative for those who require additional features to meet expanding communication needs. Battery life (based on a 05 05 90 duty cycle) is 8 hours (High Power), 10 hours (Low Power) - With Slim LiIon battery. Frequency range is 136-174MHz / 330-400MHz / 403-470 MHz/ 450-527MHz and Power output is 6W 5W (VHF) 4W (UHF)

Motorola GP328

Motorola GP328 handheld walkie talkie has 136-174 MHz / 330-400 MHz / 403-470 MHz frequency range, two way radio, 16 channel capacity, 2000 mAh li-ion battery, 320g weight.

Motorola GP-1000

MOTORS GP-1000 The radio frequency use: UHF 400-520MHz can be used in conjunction with all UHF frequency converters available on the market. signal strength, power output: 10W improve excellent communication ability up to 4km. Motorola GP-1000 is equipped with ultra-fast 3000mAh battery with Li-ion battery technology, very suitable for its capacity. Battery life is up to 36 hours, 15 days standby time with 16 channels.

Motorola GP-3688

Motorola GP-3688 has 403-440MHz frequency range, 16 channel capacity, 6-9 km range, clear audio, easy to use, durable and reliable,1 inch hidden display, 4000 mAh battery, 137 x 57.5 x 37 mm dimension and Lightweight and ergonomically designed.

Motorola MT-918

Motorola MT-918 walkie talkie is High quality and easy to use anywhere, easy to carry, ⬚ 5W power, 190 g weight including battery and antenna, 8Km to talk the distance range, 3500mAh li-ion battery, 110 x 50 x 30 mm dimension, made in Malaysia. It has 400-470 MHz frequency and it's a Waterproof walkie talkie.

Walkie Talkie

Aircom AC 111 Mini Radio

Super mini radio, frequency range 245-246MHz, preset the first 16 channels FRS and GMRS frequencies in the radio, smaller than a lighter, 60hrs standby and around 30hrs normal using time, super light design 40g.

Aircom AC 245 SBR VHF

BTRC approved, red color walkie talkie, frequency 245-246MHz, 80 channels, FM radio, VOX supported, long distance clear audio output.

Aircom AC G30

Aircom AC G30 internet walkie-talkie radio has Android 5.1 OS, supports 4G / LTE and Wi-Fi connection, voice recording in server software, communication with mobile phone by apps, long distance dispatching software with GPS positioning, group radio call, one to one private radio call, track playback, recording play and supports 3 to 4 hours non-stop communication.

Aircom AC-379L

Aircom AC-379L SBR heavy duty walkie talkie has 16 channels, 245-245 MHz frequency, 3000 mAh battery, low power alarm, silver plated reinforced plate, flashlight.

Aircom AC-558 SBR

Aircom AC-558 SBR walkie talkie has 16 channels capacity, 245-246 MHz frequency range, 1 watt power output, 1300 mAh battery, waterproof and dustproof protection.

Baofeng BF UVB2

Portable and handheld radio walkie talkie, 128 channel capacity, 4 - 5 km distance, 4800 mAh battery, LCD display, keypad lock, high gain dual band antenna.

Baofeng BF-999s

BF-999S Walkie Talkie Bao Feng 8W /5W 4200mAh Transceiver Portable Two Way Radio Upgrade BF-888s. 100% brand new and high quality. It has Strong penetrating power features, Easy control Save time and power, keep standby Busy lock, intelligent and humane Squelch, Secure transmission Intelligent, Charging Battery Save, Low Voltage Alert, Time-out Timer, Torch Light.

Baofeng BF-T1

Baofeng BF-T1 UHF single-band walkie-talkie, licensed for use, from 400 to 480 Mhz with 1 watt maximum. This set is sold unconfigured and requires the optional USB programming cable, to program the frequencies on BFT1. The Range of this walkie-talkie is 500m to 1km. It has 1 Li-ion 1500mAh battery.

Active Force
We protect your business

Leixen VV 108 mini

Leixen VV 108 mini two way radio walkie talkie has 16 channel capacity, spy transceiver, 0.5W transmission power, up to 1.5 km talk range, UHF 400-480 MHz, USB power supply, 500 mAh battery, 66 x 26 x 14 mm dimensions, 25 gm weight.

Motoplus GP-5R

245-246 MHz frequency capacity, 5 / 1W power with powerful battery, UHF / VHF band.

MOTOROLA GP 340

The popular GP340 radio is an excellent and unobtrusive way of keeping the team in contact. Streamlining operations with radio communication increases productivity and can form part of an organisation's health and safety system which is particularly important for individuals who work alone or remote from the team. In addition to the features of the GP330, the GP340 features Emergency Signalling which can be configured to send a help signal to a pre-defined person or group of people at a single push of the bright orange Emergency Button.

Motorola MT-777

PC programmable, priority scan function, color LCD backlight display, 128 channel capacity, switching between channel / VFO, display channel and frequency mode, busy channel lockout, voice annunciation, keypad lock, reverse frequency function.

Motoplus GP82 128

Dual PTT key, alarm function, DTMF encoded, programmable by PC, 128 memory channel, wire clone, battery saving function.

Motocom MC-300

Motocom MC-300 handheld SBR two-way walkie talkie radio has frequency range 245 – 246 MHz, RF output power 1W, 1500 mAh li-ion battery, long standby time with VOX function, low power alarm, DTMF, skill stun function and long-distance warning.

The MOTOROLA XiR P8600i

The MOTOROLA XiR P8600i Series is a family of DMR-standard digital radios that delivers operations-critical voice and communications. Bluetooth® audio lets you talk without wires, integrated Wi-Fi enables remote software updates, and indoor and outdoor location-tracking capabilities give you total visibility of your resources. With support for turning as well as legacy analogue technology, you can keep your organization connected as it grows. The latest energy technology provides the battery option which delivers up to 27 hours of battery life for 3-shift working, and an improved receiver boosts range further

Vertex VX-351 UHF

Vertex VX-351 UHF hand held walkie-talkie has 16 channels capacity, 5 watts power, 134 - 174 MHz VHF, 380 - 470 MHz UHF, 450 - 512 MHz, 2 programmable Keys.

Other Products

ZKTeco Access Control System

In the fields of physical security and information security, access control is the selective restriction of access to a place or other resource while access management describes the process. The act of accessing may mean consuming, entering, or using. Permission to access a resource is called authorization. Access control on information includes security of database and technical resources that will prevent unauthorized access to this field. Access control on information database can ensure through password, face detection, pin code, passkey, encoding of data and through using firewall. Information security depends on your computer access control system that how much strong is it. Access control into computer refers to approval or rejection of any query who want access on particular program. Computer based access control system always concern about unauthorized users because hacker can make this system vulnerable. So, it is the matter of day to day checking procedure otherwise it can be hacked.

Industrial Safety Equipment

We are a recognized manufacturer and exporter of Industrial Safety equipments and products which are exclusively used in various industrial, chemical and constructional industries. Made of premium quality materials these products are also available in customized form. Our offered range comprises Safety Shoes, Body Protection Products, Head Protection, Disposable Wears and others.

Virdi Access Control Device

Access control is particular restriction of entry to any physical, technical, or virtual space that ensure unauthorized access of persons or things. Access control is used in physical, technical, telecommunication, computer, data, and other relevant field. So it's vary from type to type, place to place. In physical access control we mean, restriction on unauthorized entry into particular geographical location. Border guard, security guard of different building or locations can use access control methods both manually or technically. Manual access control methods include physical presence of both controller and enterer. But, modern technology invents so many finest instrument that ensure unauthorized access control into any geographical location. It is more reliable and easy to use. It will provide exact information of every entry and exit. Several devices like turn stile, mantrap, fingerprint, eye scanner, and voice detector used to geographical access control system.

JWM Guard Tour System

A guard tour patrol system is a system for logging the rounds of employees in a variety of situations such as security guards patrolling property, technicians monitoring climate-controlled environments, and correctional officers checking prisoner living areas. is a combination of computer software and/or hardware that allows Security Guards and other users to track and report the areas they've been (called 'Checkpoints' during a "round/patrol/tour" and the time(s) they've visited each area.

Favnil IP Phone

First off, IP Phone is a technology that allows you to place phone calls over the internet. An IP phone also called a VoIP phone, is a phone that uses internet protocol, rather than the circuit switched PSTN. An IP phone connects through an Ethernet cable, rather than a phone jack, to the internet, where it connects to the IP address of either the VoIP provider or the hosted PBX provider. From a user's perspective, it works just like a traditional phone, but better. Hence VoIP phones, or more commonly called IP phones, are the physical office phones that you can use with a VoIP phone system.

Logitech Digital Video Call System

Digital video systems can store a lot of data—much more data than any other type of system. It is not unusual for us to design systems with many terabytes of video storage. This amount of storage cannot be contained in a single server or workstation. There are two ways of extending the storage: network attached storage (NAS) and storage area networks (SANs). The names are so similar that they can be confusing, but the differences are extensive.

Panasonic Pabx

A PABX is a Private Automatic Branch Exchange and a PBX is a Private Business exchange. Both serve the same purpose and that is as a telephone system for a business. If your business is looking for a telephone system that is owned by the business as opposed to by a telephone company, then you are looking for a PABX system, although in most recent years these are often referred to as PBX Systems.."

Smoke Detector

A smoke detector is a device that senses smoke, typically as an indicator of fire. Commercial security devices issue a signal to a fire alarm control panel as part of a fire alarm system, while household smoke detectors, also known as smoke alarms, generally issue a local audible or visual alarm from the detector itself or several detectors if there are multiple smoke detectors interlinked.Smoke detectors are housed in plastic enclosures, typically shaped like a disk about 150 millimetres (6 in) in diameter and 25 millimetres (1 in) thick, but shape and size vary. Smoke can be detected either optically (photoelectric) or by physical process (ionization); detectors may use either, or both, methods. Sensitive alarms can be used to detect, and thus deter, smoking in areas where it is banned.

Policom Digital Video Call System

When you utilize the capabilities of a Polycom video and audio conference system, your team can collaborate from anywhere across the world. With sharp image quality and crystal clear audio, your team can get more work done with less interference. Polycom integrates innovative features, like auto frame and zoom, content sharing, and acoustic dampening into their video conference systems. Despite the high-quality components and results, Polycom values affordability, and practicality, making them the ideal video conferencing platform for budget-conscious businesses.
The Video Conference Store is proud to offer a complete line of audio and video conferencing solutions, including high definition video and camera systems, as well as voice conferencing technologies.

Sound System

Modern sound system technology has borough revolutionary change in our daily life. From big political rally to home television, class room to theater room, we find dramatic change and new addition. Even few years ago, people depends on component stereo system for listening any kind of audio file. Now the version of audio file has been changed. We find several audio file format like mp3, ogg, wave, amr, and wcc. The quality also improved though this version of audio file. Modern music industry is highly dependent on sound system technology. Young generation has a great fantacy about iPod, head phone and listening music. They need most sophisticated version of sound system. From audio recording to playing it through loudspeaker, advance sound system technology is inevitable.

Road Barrier

Roadside barriers are used to protect traffic from roadside obstacles or hazards, such as slopes steep enough to cause rollover crashes, fixed objects like bridge piers, and bodies of water. Roadside barriers can also be used with medians, to prevent vehicles from colliding with hazards within the median.

Toa Hand Mic

A manual megaphone directs the voice into one spot. Its cone shape creates a gradual transition for sound to travel. As sound leaves the small area of the mouth, it spreads out in every direction, restricting its range. Megaphones allow a person to aim the sound in the direction they want it to go. The longer the megaphone, the farther it will project the voice. This is why people who need to project their voices long distances, like cheerleaders, use a long megaphone. Professional megaphones give a greater distance than non-professional models. The Megaphone is an easy-to-operate, hand grip type 15 W megaphone with a removable microphone. It can be used as a shoulder-type megaphone when the microphone is detached. The newly developed polyimide diaphragm is employed to ensure high sound quality.

Traffic Cammara System

A traffic camera is a video camera which observes vehicular traffic on a road. On surface roads, they are typically mounted on high poles or masts, sometimes along with street lights. On arterial roads, they are often mounted on traffic light poles at intersections, where problems are most likely to occur.

Unipex Hand Mic

This hand mic Power supply is Dry-cell battery R14PU (C size battery) x 6pcs (not included).It's distance range Sound is Approx. 315m, Siren Approx. 500m, Battery life is 18 hours. It has Waterproof performance IP54. Dimensions is φ208 x 320 mm.

Traffic Light Control Systems

Traffic light control systems are widely used to monitor and control the flow of automobiles through the junction of many roads. ... We propose a system based on PIC microcontroller that evaluates the traffic density using IR sensors and accomplishes dynamic timing slots with different levels.

Bosch Pabx

A private automatic branch exchange (PABX) is an automatic telephone switching system within a private enterprise. Originally, such systems - called private branch exchanges (PBX) - required the use of a live operator. Since almost all private branch exchanges today are automatic, the abbreviation "PBX" usually implies a "PABX."
Some manufacturers of PABX (PBX) systems distinguish their products from others by creating new kinds of private branch exchanges. Rolm offers a Computerized Branch Exchange (CABX) and Usha Informatics offers an Electronic Private Automatic Branch Exchange (EPABX).

Typhoon Drone

A drone is an unmanned aerial vehicle (UAV) that can be remotely controlled for a variety of purposes. ... Civilian use of UAVs is rapidly increasing in both commercial and personal videography. They can be pre-programmed to fly specific flight paths by integrating software and GPS information or hand manipulation.

Yealink IP Phone

IP phones come in a variety of different shapes and with a variety of operating systems. Some look and feel like traditional business phones, others have more in common with an Apple or Android tablet. Another style of IP phone is a conference phone, which has a speaker on top and has three microphones around it. A telepresence IP phone is more like a miniature television studio, with one or more cameras and one or more screens of various sizes. Videoconference phones encode and decode into video formats, rather than audio formats, but the method they do it is via internet protocol, so a video phone is an IP phone. Software, like Skype, can also be an IP phone.

We protect your business

Mavic 2 Enterprise Series

Foldable, compact and portable, the Mavic 2 Enterprise is designed to be an everyday tool

Mavic Mini

The compact yet powerful Mavic Mini is the perfect creative companion, capturing your moments in a way that effortlessly elevates the ordinary. Together with the easy-to-use DJI Fly app, you'll enjoy a simplified flying experience and a perspective unlike any other. 249 g. Ultralight. 30-min Max.

Mavic 2 Pro

DJI Mavic 2 Pro - Drone Quadcopter UAV with Smart Controller with Hasselblad Camera 3-Axis Gimbal HDR 4K Video Adjustable Aperture 20MP 1" CMOS Sensor, up to 48mph, Gray.

Phantom 4 Pro

1" 20 MP sensor and 5-direction obstacle sensing.

Mavic 2 Zoom

Powered by a 1/2.3-inch 12-megapixel sensor with up to 4x zoom, including a 2x optical zoom (24–48 mm), 4 the Mavic 2 Zoom is all about dynamic perspectives. Capture everything from wide angle to mid-range shots for even more creative options.

Phantom 4 RTK

The Phantom 4 RTK helps you envision construction plans, utilize the GIS system for property management, record changes in field conditions, generate basic maps for precise agriculture, and provide a reference for field construction and planning.

ওয়াকি-টকি আপনাকে একই নেটওয়ার্কের মধ্যে একাধিক ব্যক্তির সাথে যোগাযোগ করতে সাহায্য করে। বাংলাদেশে, ওয়াকি-টকি ব্যবহারকারীদের অবশ্যই বাংলাদেশ টেলিকমিউনিকেশন রেগুলেটরি কমিশন (বিটিআরসি) লাইসেন্স পেতে হবে। সরাসরি আমদানিকারকের কাছ থেকে লাইসেন্সকৃত ওয়াকি-টকি কিনুন। বেআইনিভাবে ওয়াকি-টকি কেনা ও ব্যবহার করা শাস্তিযোগ্য অপরাধ। তাই বেআইনি প্রক্রিয়ায় ওয়াকি-টকি ব্যবহার এড়িয়ে চলুন। আমরা বাংলাদেশে একটি নিবন্ধিত ওয়াকি-টকি সরবরাহকারী। বাংলাদেশের বিখ্যাত ব্র্যান্ডের ওয়াকি-টকির দাম এখানে জেনে নিন।

মনে রাখবেন, আপনাকে এটি **BTRC** তালিকাভুক্ত কোম্পানি থেকে কিনতে হবে। **BTRC**-এর একজন নিবন্ধিত বিক্রেতা হিসাবে, আমরা ১০০% আইনি ওয়াকি-টকি ডেলিভারি নিশ্চিত করতে পারি যাতে ভবিষ্যতে আপনি কোনো আইনি সমস্যার সম্মুখীন না হন। আপনি আমাদের কাছ থেকে কিনুন বা না করুন, আমরা লাইসেন্সকৃত পরিষেবাও সরবরাহ করি। আপনি আরও তথ্যের জন্য আমাদের ফেসবুক পেজ বা ওয়েবসাইটে (www.activesisbd.com) দেখতে পারেন, অথবা ওয়াকি-টকি কিনতে আমাদের 01630-971218 নম্বরে কল করুন।
